### **Application for TG2 Books Electronic Delivery “Beta” Programme**

We would like to make available electronic delivery and electronic copies of our books and certain documents/materials in a manner that is as easy, convenient, and inexpensive as practical. Some care is required to preserve propriety and quality. Since this is our first foray into this process, this “beta” programme is provided to assist both for your convenience, and for a chance for us to fine-tune the procedures, and we apologise if this seems too onerous. Please feel free to write to us with your comments.

The Spirit of the Agreement - the primary issues are to:

- Prevent piracy and unauthorised copies/distributions
- Preserve the quality of the product to a reasonable extent

Electronic Delivery vs. Electronic Copy:

1. Electronic delivery is the distribution of the product electronically, with the intention that it is used to produce hardcopy(s) as agreed, but not to retain the electronic medium.
2. Electronic Copies are electronic versions of the materials that generally may not be printed or distributed, but may be retained as an electronic image.
3. This Agreement deals ONLY with the electronic Delivery component, and DOES NOT permit electronic copies.
4. Electronic copies will be available once our technical developments complete the mechanism required for such. Registered Beta participants will be eligible for a free “electronic copy license” as available.

“Compensation/Incentive”: as a reflection of our gratitude for your assistance and participation in this programme, or for extra incurred fees (e.g. delivery), in addition to the electronic license noted above, *ART* will authorise “extra”, “upgrade”, or “future credit” facility as per the specifics of your particular Agreement.

### **“Beta” Electronic Delivery ONLY Terms & Conditions**

1. This is an electronic delivery mechanism in PDF format, not an electronic copy to be retained.
2. The “delivery authorisation” (as opposed to the owner/purchaser) for the electronic copy, for the current “Beta” phase, must be a medium to large organization in GB, USA, Canada, or some (not all) European countries, and certain other destinations (others to be added soon).
3. The delivery authorisation (as opposed to the owner/purchaser) for the electronic copy, for the moment, must be a signing officer of the company, and the signing company/agent together with the owner of the delivery each have the full responsibility for ensuring the terms and conditions
4. The electronic delivery is to be used to make only the number of hardcopies agreed in the purchase or on record in correspondence in advance of the printing, and may not be distributed in any manner whatsoever, and the electronic delivery is accepted in place of physical delivery as appropriate.
5. The electronic copy must be destroyed (not just deleted) once the hardcopy is produced.
6. The hardcopy requires a colour printer and is to be bound with any reasonable quality “irreversible” binding (professional binding/glue, spiral, Cerlox, etc, but not loose or “ring binders” etc).
7. The content includes “unique tracking information”. Unauthorised copies will be charged at 5 (five) times the listed price and other actions may be taken on breach of conditions or the spirit of this Agreement.
